

**Miriam, Glebe, Hobart, TAS**

Your work crew were amazing. They arrived on time and worked flat out for both days - the three of them were very skilled craftsmen and professional. Nothing was too much trouble and they took great care not to damage anything - no stained glass or other panes broken! Thank you.

**Kate, Mornington, VIC**

The Guys were great!!! So polite & friendly and cleaned up every night. Brilliant!! They even made sure my new puppy was safe inside by closing the doors each time. The job has been a great success, it has made a big difference to the temperature of the living area. I will refer your company whenever I can.

**Andrew & Annette, Perth, WA**

There has been a significant reduction in noise transmission from the road and next door neighbours as well as improved thermal properties - important factors in inner-city living and well worth the initial investment. The sash windows glide smoothly and the seals have worked well in blocking out any draughts. The heavy front door is now straight and opens/closes with little effort.

**Integrated Consultancy Group, Sydney, NSW**

Sealashash utilised their window renewal system to return 108 timber windows in a 1930's block of units in Mosman to a fully functional, compliant and weatherproofed state which in my opinion is superior to the original windows.

## Enjoy sustainable comfort with your old wooden windows

Sealash restores your original wooden windows to make them operate as good as new with high performance draught / acoustic seals, silky smooth movement and can even install more energy efficient / noise reducing glass if need be. Keep your home's beautiful traditional look with modern levels of comfort and energy efficiency with Sealash.

## Why Sealash?

Older homes and commercial buildings have rich architectural heritage including beautiful old windows and doors. Over time, most wooden windows have been neglected and badly maintained by being painted, bogged, nailed and screwed shut in a bid to stop annoying rattles and draughts. These practices commonly lead to the demise of wooden windows often through rot.

### It doesn't have to be like this.

Our service upgrades your old wooden windows/doors to function properly and upgrades the thermal/acoustic performance so you will be more comfortable. We undertake **repairs** as part of this upgrade. We don't replace, we restore and upgrade the originals which is more **sustainable**.

Sealash works on wooden doors and any type of wooden window including double sash, horizontal Yorkshire slider and awning/casement/fanlight/pivot windows.

## ^ The results speak (and pay) for themselves.

Imagine being able to:

- > Feel more comfortable
- > Reduce energy bills for heating/cooling
- > Make your home quieter and less dusty
- > Stop annoying rattles
- > Effortlessly open and close your windows
- > Protect heritage features and enhance property value

## ^ Modern materials, traditional craftsmanship.

We use modern materials combined with traditional craftsmanship to restore your windows. We do as much as necessary and as little as possible, so that you have easy to use, draught/acoustic sealed and rattle free windows.

### What we can do (video):

- > Remove and replace staff and parting beads
- > HEPA vacuum contact surfaces performance twin fin brush/compression seals
- > Remove sashes, replace sash cords, service or replace pulleys/balances, check any missing weights
- > Replace any timber that shows signs of rot
- > Reglaze your old glass with your choice of energy efficient, noise reducing or security glass

## ^ Professional work done safely and with pride.

At Sealash we stand by our professionalism, honesty and craftsmanship.

There isn't any easy or clean way to restore your windows. We use HEPA vacuums to control paint flakes/dust leaving the site safe and clean. We believe in leaving a site better than we found it. You won't even know we've been there except for the silky smooth and air tight windows we leave behind.
